

## Mass Rover Analysis

Rocky:  $2 \text{ km/hr} = 30 \text{ mins/km}$

Sandy:  $3 \text{ km/hr} = 20 \text{ mins/km}$

Smooth:  $5 \text{ km/hr} = 12 \text{ mins/km}$

### Routes

Route 1

5 km

$$50\% \text{ rocky} = 2.5 \text{ km} \times 30 \text{ min/km} = 75 \text{ min}$$

$$20\% \text{ sandy} = 1 \text{ km} \times 20 \text{ min/km} = 20 \text{ min}$$

$$30\% \text{ smooth} = 1.5 \text{ km} \times 12 \text{ min/km} = 18 \text{ min}$$

Expected Time:

$$= 75 + 20 + 18 = 113 \text{ mins}$$

Route 2 7 km

$$40\% \text{ rocky} = 2.8 \text{ km} \times 30 \text{ min/km} = 84 \text{ min}$$

$$40\% \text{ sandy} = 2.8 \text{ km} \times 20 \text{ min/km} = 56 \text{ min}$$

$$20\% \text{ smooth} = 1.4 \text{ km} \times 12 \text{ min/km} = 16.8 \text{ min}$$

Expected Time:

$$= 84 + 56 + 16.8 = 156.8 \text{ minutes}$$

Route 3 6 km

$$10\% \text{ rocky} = 0.6 \text{ km} \times 30 \text{ min/km} = 18 \text{ min}$$

$$50\% \text{ sandy} = 3 \text{ km} \times 20 \text{ min/km} = 60 \text{ min}$$

$$40\% \text{ smooth} = 2.4 \text{ km} \times 12 \text{ min/km} = 28.8 \text{ min}$$

Expected Time:

$$= 18 + 60 + 28.8 = 106.6 \text{ minutes}$$

we should pick

route 3

### Route 1 w/ crater

Base: 113 minutes

intact (70%) = save 20 mins, 97 mins

damaged (30%) = add 15 mins, 128 mins

total expected time

$$(0.7 \times 97) + (0.3 \times 128) = 67.9 + 38.4 = 106.3 \text{ minutes}$$

### Route 3 w/ bridge

Base: 106.6 minutes

intact (40%) = same, 106.6 mins

damaged (60%) = add 40 mins, 146.6 mins

total expected time

$$(0.4 \times 106.6) + (0.6 \times 146.6) = 42.64 + 87.96 = 130.6 \text{ minutes}$$

## Satellite Analysis

Route 2, no rocky

Route 2 7 km  
~~40 % rocky x 30 min/km = 210 min~~

40 % sandy x 20 min/km = 140 min

20 % smooth x 12 min/km = 84 min

assume rest is sandy

40 % sandy x 20 min/km = 140 min

Expected Time:

$$= 56 + 56 + 16.8 = 128.8 \text{ minutes}$$

no rock time

Probability not Rocky

60%

If Rocky, it takes 156.8 minutes minimum

Maximum

100 % rocky x 30 min/km = 210 minutes maximum

Don't wait, other routes are faster
